

IN CASE OF INJURY AT WORK

PAM HEALTH

NOT JUST ANOTHER DAY ON THE JOB?

WE CAN HELP

Heavy machinery, construction, manufacturing, and most major industries have work-related accidents that can lead to serious injuries.

More than 11 million people work in natural resources, construction and maintenance environments, placing them at greater risk of suffering from work-related injuries.

*2018 US Department of Labor, Bureau of Labor Statistics

- **Highly specialized national network** of long-term acute care hospitals, medical rehabilitation hospitals, and outpatient centers, each of which serves as a center of excellence for quality care and outcomes
 - **Elite teams of healthcare professionals** provide complex medical and physical care to the injured workers we serve
 - **Comprehensive scope of services** that includes everything from minor injury to catastrophic injury care
- Our team is dedicated to returning the injured worker to their pre-injury state as quickly as possible.***

Your injured worker's recovery is our top priority.
